Imaging

Goals.
- Detection
- Estimation of pr. gradient (severity)
- Quantification of Vent
  - vol
  - mass
  - fxn
- Exclusion of CAD
- Response to Rx.

CXR
- LA enlargement
- PVH
- Normal AA + arch (R/O Aortic Valve Ds)

CT/MRI
- Diastolic Signal Void from mitral valve on cine MRI
- Thickened / limited movement of MV
- LA enlargement
- Normal LVEDV / LVESV
- High velocity flow through MV
- Valvular Ca^{+2} in wall or clot lining the cavity

[D/D - annular Ca^{+2} in age related Ds.
post op M. valvotomy]

MRI: LA : AP Dia on 3 chamber view > 4cm
