How to do beeswax candle?

Beeswax candles and shapes

Para-therapeutic and relaxing attributes of beeswax candles have been known for hundreds of years. They used to be used for liturgical rites and also for providing light to rich households.

They are featured by an attractive and original outlook; they burn smokeless whilst producing a soft, gentle scent of honey and propolis, they also work as negative ionisers.

They eliminate electromagnetic radiation caused by electrical appliances and neutralize cigarette smoke.

Beeswax candles, and their process of burning

in particular, soothes and calms you down, makes breathing easier, heals blocked sinuses and provides relief for running nose and asthma and even reduces high blood pressure.

It is recommended to burn candles every day from 15 to 60 minutes.

Beeswax, the material the candles are made of, is obtained from old wax and edgings that are left out during the frame uncapping and other debris.

After melting and possible clarification and filtration, one can refine it by adding various essential or fragrance oils, although it is not necessary.

Making your own beeswax candle step-by-step:

You will need:

- » a silicon mould,
- » a wick (with appropriate thickness i.e. the larger candle, the thicker wick)
- » a rubber band
- » a toothpick
- » silicone (spray) - optional

You can spray the mould from inside with silicone to make it easier to take it out afterwards if the pattern is more complex.

How to use a mould – TIPS:

-  To make removing the candle out of the mould easier, spray the mould with spray
-  Thread the wick through the mould before filling it with wax, make sure it is stretched properly
-  Tie a string around the mould or put some rubber bands on before filling it with wax
-  Use liquid wax of the temperature of around 50 degrees Celsius

1. Preparing the mould

If we intend to cast the candle with a complex pattern, it is recommended to spray it from inside with silicone – this will make it easier to remove it once the whole process has been completed. Cut the wick of appropriate length (it has to be longer than the mould itself) and thread it through the inside of the candle. The next step is to put the rubber bands onto the mould followed by sticking the toothpick into the wick's ending and stretching it properly.

2. Filling the mould with wax

It is recommended to melt the wax in the pot (enamelled). Prior to filling the mould, make sure that the wax has got an appropriate temperature – around 60 degrees Celsius is recommended. It must neither be too hot nor too cold. Pour the wax in gently, making sure it gets into all mould's pockets. The time needed for the wax to set depends on the size of the mould.

3. Removing a candle from the mould

Once the wax has set and become cold, take the rubber bands off, open the mould and gently remove the candle followed by taking the toothpick off. Cut the wick off at the bottom and leave around 1 cm of wick on the top.

The last part of 'making the candle' is to finish it off with a knife – cutting all sticking-out parts at the bottom and dipping the wick into the fluid wax.

Once done, candles may be decorated by using special wax markers; more advanced users can use 'decoupage' technique or natural products such as coffee beans.

Candle moulds with beekeeping theme

Saint Ambrosius is perceived to be beekeepers' patron as there is a myth of bees clustering honey on his mouth. His relics rest in St. Ambrosius Cathedral in Milan. Liturgical commemoration in the Catholic Church is celebrated on the 7th of December.

Candle self-making kit

FS001
Candle self-making kit

Kit includes 7 colours of wax foundation: natural, green, yellow, red, coral, navy blue, plum and also a wick. Engraved and flat sheets are selected randomly. The kit guarantees good fun for the entire family. It helps develop creativity and imagination of children. Some examples of how to make a candle can be found on the back.

Clarified wax

We have got clarified wax on offer, coming in the shape of 1kg or 0,5 kg bars.

801W
Clarified wax, 1 kg

FD0027
Square lantern, white net
with heart, glass input

Lanterns serve as an ornament but also to illuminate the interior. In your special moments they will provide magical atmosphere. Suitable for living room, bedroom and perfect as a table decoration. Our lanterns and candlesticks will ensure unique character to your home. Candles do not have to be alight to make lantern look spectacular, they are very decorative on their own. Lanterns make a perfect gift for any occasion and coupled with candles made of beeswax provide a feast for the senses.
